

BUSINESS COCKTAIL Welcome Back to Work
in Košice

The Welcome Back to Work Cocktail already has a long tradition in Bratislava. This year, DoubleTree by Hilton Hotel hosted its successful premiere in Košice. More than 80 representatives of AmCham member companies from the region showed up and helped create a very relaxed networking atmosphere.

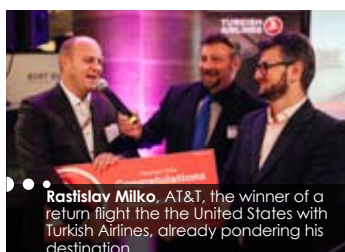

The guests had the opportunity to try a variety of Caribbean rums specially selected for the occasion, or listen to a live performance by Lukáš Adamec, a Košice native. As a special bonus, one of the guests went home with an open ticket to the United States, with the possibility to choose his destination. The prize for the lucky winner was provided by Turkish Airlines.

It was obvious that this format has found its fans as well as a suitable venue also in Košice and it seems very likely that it has earned its spot in next year's calendar of events too.

SPECIAL EVENT 

Member Tour

AmCham member tours offer a unique opportunity to take a peek behind the scenes of some of the most interesting member companies. It is also a very pleasant and non-traditional way to spend the day, network with people from other companies, explore how other companies function and perhaps find some valuable inspiration. This year the member tour consisted of a very interesting combination of two dynamic technology-oriented companies operating out of Trenčín. The Adient Technology Center is the biggest automotive technology center in Slovakia with 420 employees working on development and testing of complete seat systems and seating components for various car models. The participants had a chance to see the work of engineers and designers and all their work which precedes the construction of innovative seat systems and other products for the car industry. After a deserved lunch, which offered the opportunity to exchange fresh impressions and thoughts,

the tour continued at Virtual Reality Media. The company specializes in the design, development and production of state-of-the-art simulators and training systems. The highlight of the visit was undoubtedly the chance to try a demo flight on the helicopter simulator.
